Equitable Resilience Feeder Fund Hedged Accumulating USD Share Class X3 (ISIN: GB00BZ8FPL72)

A sub-fund of Equitable Investments Feeder OEIC. The Fund is managed by Equitable Investments Ltd.

Objectives and Investment Policy

The Fund aims to generate capital growth by investing in a diversified portfolio of well-capitalised, high-growth equities. The Fund is typically close to fully invested in equities, holding a diversified portfolio of mid to large-cap companies listed on developed stock markets. The fund may also hold cash or fixed income securities.

The investment portfolio is actively managed and the portfolio's currency exposure is hedged, to reduce the impact of exchange rate movements.

Risk and reward profile

- The Fund invests in an actively managed portfolio of Equities which may fall or rise in value. Accordingly, you may get back less than you invested. The risk and reward category is not guaranteed and may change over time.
- This scale gives an indication of how much a fund's performance has fluctuated in the past and therefore the potential risk of losing money. The lowest category does not mean risk free. The Fund does not offer any capital guarantee or protection.

Risks that are materially relevant to this Fund:

- The Fund is subject to the general investment risks of the value of underlying investments i.e., shares of companies whose value can go up or down due to, amongst other factors, changing business, economic and political conditions, taxation policies and monetary policies.
- The Fund uses forward transactions or derivatives, for the purposes of efficient portfolio management, specifically to hedge foreign exchange risk. This may expose the Fund to a credit risk with regards to counterparties, changes in exchange rates, imperfect tracking between the change in value of the derivative and the value of underlying assets and additional transaction costs.
- This is a hedged share class. Currency hedging is designed to reduce the effect of exchange rate movements on the investment returns in the currency of the share class, however this is not guaranteed. Currency hedging may lead to reduced or increased investment returns. The returns of this currency hedged share class may vary from the performance of another currency share class of this Fund.
- The Fund may not be treated as tax transparent in one or more relevant jurisdictions outside the UK. Changes to the tax status of the Fund in any such jurisdiction could lead to unexpected taxation of dividend income. The other risks are detailed in the Fund's Prospectus.

Recommendation: The Fund may not be suitable for investors who plan to withdraw their money within five years.

Charges for this Fund

One-off charges taken before or after you invest

Entry Charge (Max)	None
--------------------	------

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Exit Charge (Max)	None
-------------------	------

Charges taken from the Fund over the year

Ongoing Charges	1.06%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance Fee	Not Currently Charged*
-----------------	------------------------

*As the Fund's assets are currently below £350 million, the Fund is not currently incurring any performance fees.

The Equitable Fee Model:

Management fees of 0.7% per annum are charged on only the first £350 million of assets in the Master Fund. No management fee is charged on assets in excess of £350 million.

Performance fees of 10% of the returns generated are charged only on the returns attributable to assets in excess of £350 million. No performance fees are charged on assets below £350 million. Performance fees are calculated with respect to the high-water mark of the Master Fund's unit price.

See Appendix 6 of the Prospectus for a detailed explanation of the Equitable fee model.
